PROFILE INFO

I'm a 3rd-year Applied Computer Science student from Türkiye studying at Thomas More University in Belgium, where I've developed a passion for transforming complex ideas into intuitive, efficient software. Having completed 20+ projects with classmates from different cultural and technical backgrounds, I've learned to thrive in diverse teams and value communication as much as code quality.

With an active NATO SECRET security clearance from the Turkish Ministry of Foreign Affairs, I bring not only technical skills but also a mindset of integrity, reliability, and professionalism to every project I work on.

HARD SKILLS

- Machine Learning, AI fundamentals, Data Science
- Python, Java Development
- HTML, CSS, JavaScript
- Cloud & DevOps basics
- Software Modeling (UML)
- Data Engineering, BI & data visualisation
- Operating Systems, Networking, Security Essentials
- Application Security
